

## The Resin Flooring Starting Checklist

A 20-question checklist to help you get a resin floor you love - the first time!

### Resin Flooring Knowledge

- Have you read the "What You Should Know About Resin Flooring" document?
- Have you read the "Turning Your Current Floor Into a Resin Floor" document?

### Design Choice/Ideas

- Do you have a real example or at least a picture that captures what you want?
- Will it look too "busy"/bright/dark for the area in question?
- Is your design practical for cleaning purposes, e.g. white floors are very hard to keep clean?
- What type of finish do you want - full gloss, semi-gloss or even non-slip?

### Contractor Selection

- Is your contractor licensed or qualified?
- Do they have a good collection of testimonials and previous projects to show you?
- Do they use resins you're comfortable with, e.g. no solvents?
- Are they willing to admit product limitations and help you understand any risks?
- Do they inspect for moisture, flatness etc. and use a grinder to prepare the concrete?
- Have you filled them in on the history of the slab (if known)?
- Does their quote spell out everything - film thicknesses, inclusions, exclusions?
- Can they give you a warranty that clearly explains what is and isn't covered?
- Will they take photos and record every stage for quality control?
- Will they show you a hard sample before commencing?

### Installation

- Can you remain off the floor for the agreed period while it hardens?
- Can you close the area off to stop bugs, dust or other trades affecting finish?
- Can you provide easy access for your contractor and his equipment?
- If other trades are involved, is it possible to leave the flooring to last?
